(14.)

If this screen appears check "all file connections"

Click "Allow this connection"

(15.)

Press the **Back/Escape** button to get pass this screen.

#### Quick Start Guide

Welcome to Nuance VoiceControl. Before we finish the setup procedure, please read this short guide.

Press the defined convenience key, let it go, wait for the beep, speak your command, and press the convenience key again.

To make calls, say: "Call [first] [last]", where [first] and [last] are the names

(16.)

You will see an Image telling you how to make a request.

- 1) Press and Release the button on the left side of the Curve.
- 2) **At the beep speak your command naturally** (holding the unit about 3 inches from the mouth)
- 3) Press the button again when you finish speaking your command. Unit will beep in a few seconds when command is returned.

Click the back **Button/Escape** to get pass this screen.

How to make a request

EDGE

To Start Nuance  
Voice Control on  
your 8320

(17.)

Follow the instructions from the previous screen to place your command.

When placing a command you will see the screen shot to your right.
